

NRX[®] Arch Strap

Material

NRX[®] Strap 50 mm with 30 mm reinforcement, either NRX[®] PLUS or NRX[®] Strap

1

Cut the length according to the circumference of the foot plus 2 cm. The reinforcement should cover half the length of the main construction.

2

Apply the strap with the hook running from the outside. Stretch the strap so it supports the arch.

3

Secure the strap so the hook is positioned over the arch. This way it will provide a slightly lifting to the arch during loading.

4

Attach the reinforcement strap on the lateral side. Stretch the strap and apply it over the main strap, running into the arch.

5

Attach the reinforcement strap on the lateral side. Stretch the strap and apply it over the main strap, running into the arch.

Caring instructions

The NRX[®] strap can be washed in 40° C machine wash with a liquid detergent. Always use a laundry bag. Remove the hook parts before washing and let air dry.
